A good season for beans

Forty plots this year, and the longest dry spell since the site opened.

The water rota worked: nobody went a week without a turn at the tap.

Runner beans did best, squash did worst, and the shared compost bays are full for the first time. The chart below is plots harvested by month.

Plot rota, autumn

Week	Tap	Compost	Gate
1	Plot 3	Plot 11	Plot 20
2	Plot 7	Plot 14	Plot 2
3	Plot 9	Plot 18	Plot 5
4	Plot 12	Plot 1	Plot 16
